

Blandin Foundation™  
STRENGTHENING RURAL MINNESOTA

FOR IMMEDIATE RELEASE

## **Sherburne County selected as a Blandin Broadband Community**

*Two-year partnership provides planning, technical and financial support to help county meet its digital technology goals*

Brainerd, Minn. (November 20, 2014) – Blandin Foundation announced today that Sherburne County leaders were successful in their application to become a Blandin Broadband Community, one of only 10 selected in the state. The announcement was made today in Brainerd, before more than 160 participants in the *Border to Border Broadband: No Community Left Behind* conference, co-sponsored by Blandin and Connect Minnesota.

The Blandin Broadband Communities program is an intensive, two-year partnership between Blandin Foundation and selected rural Minnesota communities. The program provides planning, technical and financial support to communities that demonstrate the determination to bring the benefits of a broadband-enabled economy to their communities.

Sherburne County is one of ten new rural Minnesota communities that will join nine previously-named Blandin Broadband Communities in the state. Other Blandin Broadband Communities announced today are the Central Woodlands (east central Minnesota), Resilient Region 5 (north central Minnesota), Martin County, Chisago County, Redwood County, Renville/Sibley Counties, Red Wing, Nobles County, and Carlton County.

“At Blandin Foundation we recognize that broadband access – and the skills to use it -- are essential to expanding opportunity for all. Thanks to community leaders in Sherburne County and in the other communities with whom we partner, Minnesota is making important strides toward ensuring that rural places and the economically and socially disadvantaged are not left behind,” said Bernadine Joselyn, Director of Public Policy and Engagement.

Communities were selected based on demonstrated commitment to work together across sectors to set and meet information technology goals and bridge digital divides.

“As we filled out the Blandin Broadband Community program application it became apparent to all involved how important Broadband infrastructure is to the entire Sherburne County region. We received support from many sectors including cities, townships, school districts, private businesses and Chambers of Commerce throughout the County. We are thrilled to be partnering with the Blandin Foundation to help us connect Sherburne County,” said Dan Weber Sherburne County Economic Development Specialist.

Leading their work is the Sherburne County Broadband Coalition, a group whose goal is to enhance the quality of life for citizens through efficient use of technology. Together, with education, nonprofit and business partners throughout the county, the Broadband Coalition will rally local leaders to develop a sustainable model for broadband access and use in Sherburne County.

“It takes strong local leadership and commitment from whole communities to tackle the tough issues related to Internet access and use,” said Dr. Kathy Annette, Blandin Foundation CEO. “We’re honored to stand with Sherburne County as they design and claim a vibrant, connected future.”

Next steps in the Blandin Broadband Community partnership include assessing the community’s current broadband access and adoption and, in early 2015, a series of public planning meetings.
